

Hello all! It's that time of year again to begin thinking about the state of our yards and to make plans for lawn and garden projects for the upcoming growing season. We are gearing up to begin our Fertilizer Maintenance Program and wanted to get the latest information out to all interested customers.

YardQuick offers a Fertilizer Maintenance Program that is economical and convenient. We are proud to offer quality Woodburn products with the best formulated fertilizers for each season, reducing confusion and hassle by guaranteeing your lawn is getting the right amount of nutrients at the right time. Woodburn's fertilizers contain a slow-release Nitrogen compound that continues to nourish your lawn for up to 8 weeks after application. We also use a broadleaf herbicide to "spot-spray" weeds during our fertilizer application process. If you prefer not to have the herbicide spray, just note it on the sign-up sheet under notes/special instructions.

Fertilizer Application Program

3 Applications: Spring, Summer & Fall
(Approx: Memorial Day, 4th of July, and Labor Day)

Price Range: 1,500-5,000 sq. ft..... \$55-\$90 per application
(Prices vary depending on size & topography of yard)

(Please call for a BID appointment for lawns or property larger than 5000 sq ft.)

We also have a Fertilizer Drop-Off Program, for convenient product delivery to your doorstep. We have a delivery fee of \$3 in-town (Pullman/Moscow) and \$5 out-of-town (15 mi. radius of Pullman or Moscow) or \$7 (15+ mi. radius). Special request deliveries that are not included in the normal service program will incur an additional charge. Fertilizer prices fluctuate with the price of Petroleum: prices below are good for the next 3 months.

Fertilizer Drop-Off Program

PRICE GUIDE:

Fertilizer: 50lb bag.....\$ 37.00 + delivery fee

Weed-n-Feed: 40lb bag....\$ 37.00 + delivery fee

Lawn Seed Mix: \$4.00/lb or \$3.50/lb for orders over 50lbs

Moss Kill: 40lb bag.....\$76.00 + delivery fee

Compost: \$20.00/cu. yard + delivery fee of \$45.00 in Moscow & Pullman, delivery fee from \$52-\$55 for outlying areas.

For customers who wish to sign-up for the Fertilizer Drop-Off Program, we will deliver all of the needed supplies for the whole season in May so the delivery fee is just a one time charge.

If you would like to be included in our Fertilizer Maintenance Program please fill out the enclosed sign-up sheet and return it to our office by **May 10th**. Thank you!
The sign-up sheet is also accessible on our website: www.aqualawninc.com

Woodburn Fertilizer

Product Specifications

Summer Green

30-3-9

Quality High N Summer Fertilizer

55% Slow-Release Nitrogen

Summer Green is a high quality turf fertilizer with a strong following among golf course, lawn care, school, park, and athletic turf management professionals. This product contains a good ratio of nitrogen, phosphorus, potassium, sulfur and non-staining iron sulfate. It is uniformly and specially blended to be economical, clean and easy to spread, with proven residual and good response.

Summer Green has 55% controlled release nitrogen from Duration™ Type II, Polymer Coated Urea. This source of slow-release nitrogen features a complete release of nitrogen as much by temperature as moisture.

This product contains non-staining Iron

Caution: Plant nutrients can cause staining. Even though this product contains non-staining Iron it should be swept off concrete immediately after application and prior to rain or irrigation.

APPLICATION RATES

	Actual N desired per 1000 sq. ft.	Lbs Product per 1000 sq. ft.	Square Feet of Bag Coverage
LOW	1.00	3.33	15,000
MEDIUM	1.50	5.0	10,000
HIGH	2.00	6.66	7,500

Directions: Apply the amount of fertilizer prescribed evenly and uniformly. Irrigate the treated area following application. Generally the prescribed application will be at the medium rate. Special conditions or situations might dictate the high or low rate. Applicator judgment and experience should be used with this and all other fertilizer products.

Regal Green

21-4-21

Quality High K Spring or Fall Fertilizer

50% Slow-Release Nitrogen

Regal Green is a quality turf fertilizer specially blended to be economical with a good nitrogen to potassium ratio for lawn care, fairways, parks and school grounds. It increases drought and disease resistance and improves winter hardiness.

Regal Green will give good early response. Its slow-release nitrogen continues to feed the turf 6-8 weeks under most conditions. 50% of the Nitrogen in Regal Green is controlled release from Duration™ Type II. The high Potassium ratio will enhance the turf strength to better utilize water and resist diseases. The addition of minor nutrients with iron provides rich plant color.

This product contains non-staining Iron

Caution: Plant nutrients can cause staining. Even though this product contains non-staining Iron it should be swept off concrete immediately after application and prior to rain or irrigation.

APPLICATION RATES

	Actual N desired per 1000 sq. ft.	Lbs Product per 1000 sq. ft.	Square Feet of Bag Coverage
LOW	.75	3.50	14,250
MEDIUM	1.00	4.75	10,500
HIGH	1.50	7.25	6,900

Directions: Apply the amount of fertilizer prescribed evenly and uniformly. Irrigate the treated area following application. Generally the prescribed application will be at the medium rate. Special conditions or situations might dictate the high or low rate. Applicator judgment and experience should be used with this and all other fertilizer products.

Perfection Weed & Feed

21-7-14

Quality Weed & Feed with Trimec® Herbicide

Perfection Weed & Feed is a Trimec® herbicide containing fertilizer, 2,4-D, mecoprop-p, and dicamba. This granular Weed and Feed controls a wide spectrum of broadleaf weeds in turf while at the same time effectively providing essential plant nutrients. Effective on bedstraw, chickweed, clover, dandelion, dock, henbit, knotweed, lambs quarter, mallow, morning glory, oxalis, plantains, sheep sorrel, shepherd's purse, speedwell, thistle.

Perfection Weed & Feed Trimec® herbicide is intended to be applied by commercial applicators, noncommercial users, lawn care operators, and landscape personnel. Cool season and warm season grasses established in institutional, ornamental, and residential sites may be treated. **TRIMEC®** is a registered trademark of **PBI/GORDON CORPORATION**

APPLICATION RATES

Bag Size Pounds	Desired Rate Per Acre Pounds	Desired Rate Per 1,000 sq. ft. Pounds	Treated Area for This Bag Size Square Feet
40	174.2	4.0	10,000

Directions: Mow lawn to normal height 1 to 2 days before application. Water lawn thoroughly at least 1 day before application to sustain moisture until next watering. Apply when weeds are young and actively growing, preferably in the morning when dew is on the grass. If grass is not moist at the time of the application, sprinkle lightly with water to hold the materials and prevent drift onto non-target plants. Do not wash from weed leaves for 1 to 2 days. At this time a thorough watering should be made.
